

QC-1100-LT UV&Cold Foil system

Basic information

Name: QC-1100-LT UV&Cold Foil system
Producer: Shanghai FENGTAI Machine
Year:
Reference number:

Opis Dodatkowy

The system is part of an extension of screen printing capabilities and fully connected to an automatic screen printing machine. The system allows the process to be finished by cold stamping. A system that allows finishing the process with such effects as "paint creasing", "snowflake" technology, UV "glazing", cold foil stamping or other technological solutions.

Stan techniczny maszyny

The machine is new.

Serwis

We provide professional service of printing machines. Thanks to the in-depth knowledge of the printing industry with which we have been associated for over 20 years, we can offer comprehensive maintenance services.

Technical data

Maximum working width	1100 mm
Minimum working size	350 mm
Maximum printing area	1050 mm
Paper thickness	157g -450g

Maximum film diameter	Φ200
Maximum film width	1050 mm
Maximum painting speed	UV: 4000p/h
Maximum painting speed	Cold foil stamping: 500-1200p / h
Total weight of the equipment	700 kg
Total power of the device	31KW/41KW
Lining length	0,75 m
Length of the UV part	3,85 m
Length of cold foiling	2m
