

FT-SF900 Screen printing machine with full control

Basic information

Name: FT-SF900 Screen printing machine with full control

Producer: Shanghai FENGTAI Machine

Year:

Reference number:

Opis Dodatkowy

Full-size printing can reach speeds of 4,500 sheets/hour, while ensuring the correct quality of the manufactured product. For printing personalized dimensional usages, speeds can reach up to 5,000 sheets/hour. It is an ideal choice for industries such as high-quality paper and plastic packaging, ceramic and glass paper, textile transfers, metal marking, plastic film switches, and electronic and electrical components. The machine design dispenses with the traditional mechanical transmission shaft, gearbox, chain and crank mode and thus adopts multiple servo motors to separately drive the paper feeder, cylinder and screen frame. Through automation control, it ensures the synchronization of several functional units, not only eliminating many mechanical gear components, but also greatly improving the rigidity of the printing machine, reducing errors caused by mechanical gear devices, and improving print quality and mechanical efficiency, raising the automation level of the production process and improving the working environment.

Stan techniczny maszyny

The machine is new.

Serwis

We provide professional service of printing machines. Thanks to the in-depth knowledge of the printing industry with which we have been associated for over 20 years, we can offer comprehensive maintenance services.

Technical data

Max. Sheet size	920mm×620mm
Min. Sheet size	350mm×270mm
Max. Print size	900mm×600mm
Sheet thickness	100(g/㎡)--420(g/㎡)
Print speed	400-4200ark/hour
Registry	±0.05mm
Grabber	≤10mm
Screen frame	1140x1140 mm
Dimensions	3800 x 2650 x 2050 mm
Total power	21.8 kaw
Weight	3500 kg
