

FT1050 Automatic Screen Printing Machine

Basic information

Name: FT1050 Automatic Screen Printing Machine

Producer: Shanghai FENGTAI Machine

Year:

Reference number:

Opis Dodatkowy

The machine adopts classic stop-cylinder technology, the highest operating speed reaches 4,000 sheets per hour; at the same time, it uses non-stop feeding technology and continuous pickup on lining. This technology changed the mode of operation of the previous automatic screen printing machine, which had to be stopped in order to load as well as pick up paper. This adjustment removed the time loss resulting from the process of loading and unloading paper through the automatic screen-printing machine, resulting in a more than 20% increase in efficiency. The machine is used in ceramic and paper production, advertising, packaging printing, signage, textile transfer, electronics and other industries. In the standard model, the height can be increased by 300 mm, 550 mm (can reach a loading height of 1.2 meters).

Stan techniczny maszyny

Machine New.

Serwis

We provide professional service of printing machines. Thanks to the in-depth knowledge of the printing industry with which we have been associated for over 20 years, we can offer comprehensive maintenance services.

Technical data

| | |
|-------------------|--------------------|
| Max. Sheet size | 1050mmx750mm |
| Min. Sheet size | 560mmx350mm |
| Max. Print size | 1050mmx740mm |
| Sheet thickness | 80(g/㎡)--350(g/㎡). |
| Print speed | 400-4000p/h |
| Screen frame size | 1300mmx1170mm |
| Mass | 5500kg |
| Power | 16kw |
